

Blackness of Blackness is Reversal, Absence, Void, Reflection
Reflection is 2, A, Purple. It is the left circle of the second row.
Its planet is the Moon, its color is Purple and its metal is Silver as
Purple is what Silver tarnishes to when not freely exposed to air.
The metals of the planets are associated by color as the color is
that which is the specific absence of the metal, which is the
tarnish or ore.

Purple is particularly appropriate as a color for Specific Absence
since it specifically does not exist. Violet is the nearest color
that does exist. You get Purple by mixing Red and Blue negatively.
Or by staring at Yellow and then looking at a white background,
which makes the specific absence of Yellow.
