

Causality

There are four different kinds of actual causality
 and virtually innumerable kinds of virtual causality
 Actual causality produces real changes
 Virtual causality produces virtual changes
 Real changes are changes to the structure of existence
 Virtual changes are changes to the perception of existence
 Magic is the art and science of real change - Transformation
 Sorcery is the art and science of virtual change - Foresight

The four kinds of actual causality are
 Evolution, Reaction, Recursion and Recusion

Evolution

Evolution causes things to be what they are
 and to resist change from what they are - Inertia
 and if they change from what they are
 to be the next appropriate kind of thing in the sequence of kinds
 Evolution is of the nature of thingness
 It proceeds from beginning to end
 from root to leaf, from bottom to top
 The sequence of causality of EVOLUTION is the same as the sequence of kinds
