

All other sequences are not inherent  
A sequence that is a part of an inherent pattern  
is the specific absence of an inherent pattern  
is a virtual causality that can modify and direct an actual causality  
it is called Fortune

A pattern that is regular without being part of an inherent pattern  
but is complete  
defines virtual perception  
thus that pattern can be used for knowledge or understanding  
it is called Image

A sequence that is regular but not inherent nor complete  
is the virtual absence of virtual perception  
there are about a billion of them  
though some of the patterns are pretty sketchy  
it is called Shadow

A sequence that is not patterned at all  
defines chaos  
it is called Void  
there are more than a sextillion of them

since chaotic randomness of Void is inherently negative  
the recursion of it produces the absence of it  
and randomness acquires order  
and Void becomes Order and existence

the Inherent relationship of Recursion of the Alephbet is a Fate  
the sequences of cyclical time and rulership are Fortunes  
and their locations within the Alephbet are Shadows

the cards of the Tarot are Fate  
the order of the Tarot is an Image  
and so the random fall of the cards  
brings Truth out of Chaos

the sequences and meanings of the Tarot devised in the 17, 18 & 1900s  
are Shadows and thus reflect the Cardplayer  
more than they reflect Truth  
and have no causality to help or harm  
beyond the bare will of the Player

and finally, the building blocks of existence  
in Life and in Death  
are Voids

and so our world can be whatever is momentarily appropriate
