

Ogham alphabet

What defines the individual consonant in the group of three is how it relates around the 12 pointed star, which connects the consonants in the color order of the rainbow, the order of Recursion.

In China that 12 pointed star is called "Phoenix spreads its Wings".

In the West it is called the "Gordian Knot"

Purple to Blue to Green to Yellow to Orange to Red and back to Purple

Each consonant resembles the one that precedes and follows it
