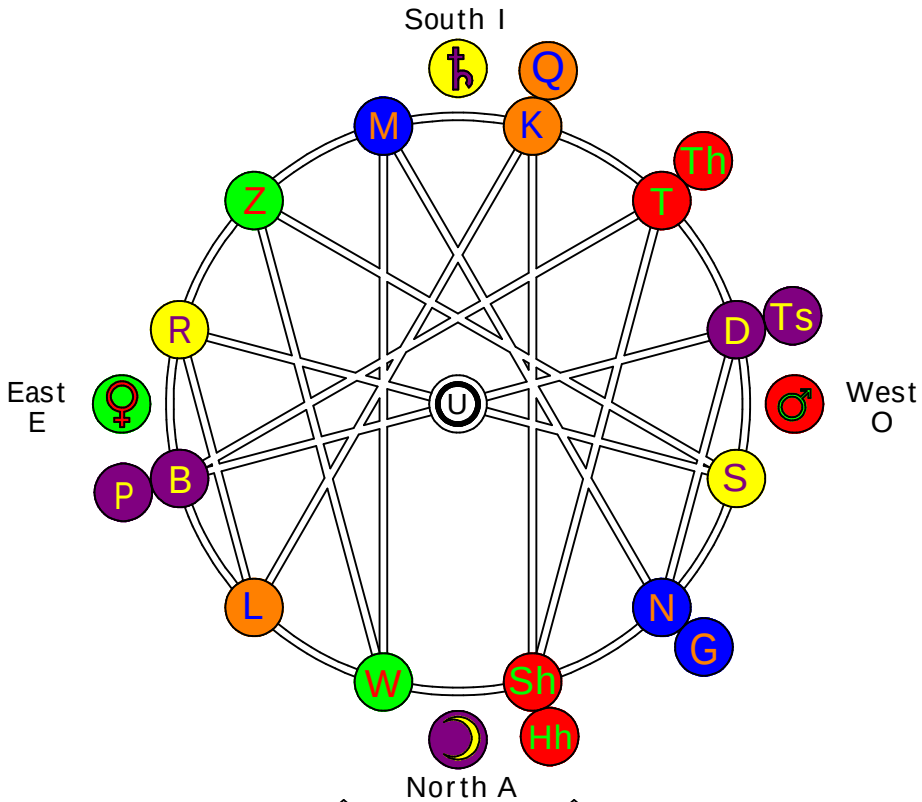
Alephbet alphabet

P Ts B D A	W Z E	Q K L OO	G M N EE	S R Y	Hh Th Sh T O

- B G D - W Z Hh Th - K L M N S - P Ts Q R Sh T -

then insert the singular vowels in their order

A B G D E W Z Hh Th Y K L M N S O P Ts Q R Sh T (U)


And we have the Hebrew alphabet of 23 letters of which only the first 22 are written.
The significance of each of the doublings, transpositions and sequences will be found in the Book on Causality.
Note that the doublings are regular when read around the circle, double letters grouped one, two, three counterclockwise and single letters grouped one, two, three clockwise.
If you trace around the Phoenix star, the doubles and singles shift back and forth to one another at the balanced colors of Blue and Orange.
