Awareness of Limits

The travelers escape to the Black Pit.

This parallels the awareness that allowing judgment to judge itself has immediate limitations and is not actually acceptable when dealing with anything more complex than obvious immediate cause and effect.

In dealing with awareness it is discovered that it is insufficient to solve the problems of awareness. Awareness of awareness - knowledge - is required. Knowledge must address two questions. The negative and positive self reference of knowledge - truth and falsity.

1 Consider the sentence - "This sentence is false".

If it is true, then it is false. If it is false then it is true.

It is contradictory.

2 Consider the sentence - "This sentence is true".

If it is true, then it is true. If it is false, then it is false.

It is indeterminate.

Negative self reference of knowledge is contradictory and cannot be resolved by knowledge.

Positive self reference of knowledge is indeterminate and cannot be resolved by knowledge.
